

MUSTAFA AKSU

Salesforce Developer · Revenue Cloud · Industries CPQ

Nigeria · Open to relocation — Germany / DACH

mustafa.aksu@mustafaaksu.dev · mustafaaksu.dev · [LinkedIn](#) · [GitHub](#) · [Trailhead \(Five Star Ranger\)](#)

PROFESSIONAL SUMMARY

Salesforce Developer with seven active certifications and eight Trailhead Superbadges, specialising in Apex architecture, async patterns (Queueable, Batch, Schedulable, Platform Events), and end-to-end integrations (MuleSoft, REST/SOAP, SAP S/4HANA). Owns Revenue Cloud (RLM + CLM) and Industries CPQ implementations from declarative design through trigger frameworks, unit testing, and SFDX / GitHub Actions deployment. MSc Computer Software Engineering · bilingual EN/DE portfolio · targeting Salesforce Developer roles in the DACH market.

SALESFORCE PROJECTS

TechnoStore — Quote-to-Cash on Salesforce Revenue Cloud — *Salesforce Developer / Solution Architect* 2025 — present

- Built end-to-end Quote-to-Cash demo for a B2B electronics supplier targeting DACH — Revenue Lifecycle Management (RLM) + Contract Lifecycle Management (CLM) + Industries CPQ.
- Orchestrated seven external systems (Stripe, Sendcloud / DHL, DocuSign, JIRA, Slack x2, Notion) via MuleSoft Anypoint Studio with HMAC-SHA256-verified webhook callbacks.
- Applied the Kevin O'Hara sfdc-trigger-framework across a six-package SFDX layout; full Apex test coverage; published OpenAPI 3.0 specs for inbound webhooks.
- Documented architecture as an arc42 blueprint plus a 50-entry STAR-format Notion portfolio generated programmatically via a custom Apex Notion-publishing service.
- Extending with SAP S/4HANA via MuleSoft (Product Master sync, Order Acknowledgment on activation) and a DATEV integration for the DACH back-office story.
- **Repository:** github.com/aksumustafa1625/TechnoStore

Urla Shoes — Multi-feature Salesforce platform sandbox — *Salesforce Developer* 2024

- Route Safety LWC: combines Google Maps Directions, OpenWeather (5 parallel waypoints via Promise.all) and an Einstein Prompt Template (GPT-4o mini via ConnectApi.EinsteinLLM) into one screen — AI verdict colour-coded by hazard keyword (storm/ice ! red, caution ! amber, else green).
- Contact Enrichment Queueable: on Contact insert, hits Nationalize.io with HttpCalloutMock coverage across six scenarios (success, empty, HTTP 500, missing FirstName, bulk-10, parser unit test); writes country to a custom field.
- Lead Queue Routing: scheduled batch (LeadQueueScheduler) + Platform Event (Lead_Shift_Event__e) + LWC dashboard (leadShiftDashboard) for shift-based lead distribution.
- Loan Sync Pipeline: custom objects (Loan__c, Loan_Sync_Log__c) + Opportunity-triggered sync service + retry scheduler (LoanSyncRetryScheduler) with audit logging.
- Reseller Matching Engine: multi-criteria reseller scoring (ResellerMatchingEngine + ResellerMappingSelector) + Opportunity trigger + LWC badge (resellerTierBadge) for partner tier visualisation.
- Platform foundations: extensible TriggerHandler framework (recursion guards, bypass mechanism), round-robin task assignment, SLA expiry automation.
- **Repository:** github.com/aksumustafa1625/urla-shoes

TECHNICAL SKILLS

Revenue Cloud: Salesforce CPQ (Admin), Industries CPQ (Developer), Revenue Lifecycle Management (RLM), Contract Lifecycle Management (CLM), Salesforce Billing, Quote-to-Cash architecture, subscription & usage-based pricing

Salesforce Platform: Apex (PD II), Lightning Web Components (LWC), Aura, SOQL / SOSL, Flow Builder, Validation Rules, Platform Events, Async Apex (Queueable, Batch, Schedulable), Trigger frameworks (Kevin O'Hara), Visualforce

Industry & AI: Agentforce Specialist, Einstein Prompt Templates, ConnectApi.EinsteinLLM

Integration: REST APIs, SOAP APIs, Named Credentials, External Services, Platform Events, Webhooks (HMAC-SHA256), MuleSoft Anypoint, SAP S/4HANA, OpenAPI 3.0

DevOps & Tools: Salesforce DX (sfdx), VS Code + SF Extensions, Scratch Orgs, Workbench, Data Loader, Postman, Git, GitHub Actions, CI/CD pipelines, Salesforce DevOps Center, Copado (basics)

Other: JavaScript (ES6+), TypeScript, HTML, CSS, Agile / SCRUM, JIRA, OAuth2, JSON, JWT

Languages: Turkish (native), English (professional), German (Goethe A2 — in progress)

SALESFORCE CERTIFICATIONS

Platform: Administrator (Oct 2024), Platform App Builder (Apr 2025), Platform Developer I (Nov 2024), Platform Developer II (Dec 2024)

Industry & Revenue: Industries CPQ Developer (May 2025), CPQ Administrator (Mar 2025)

AI: Agentforce Specialist (Jan 2025)

TRAILHEAD

Five Star Ranger · 518 badges · 258K points · 8 Superbadges (Advanced Apex, Apex Specialist, Apex Callouts, Apex Web Services, Inbound Integration, Named Credentials, Platform Events, Platform API) · [@aksumustafa16](https://www.trailhead.salesforce.com/users/aksumustafa16)

COMMUNITY

Founder & operator — [Salesforce Revenue Cloud | Germany](#) LinkedIn group (279 members) · 11,982 LinkedIn followers writing about Revenue Cloud, integrations, and the DACH Salesforce market.

EDUCATION

MSc Computer Software Engineering — *North American University* Jan 2021 — May 2023

Capstone: cloud-based SaaS subscription-billing application with JWT authentication, dynamic pricing modules, and Hibernate ORM persistence. Coursework: distributed systems, software architecture, database optimization, NoSQL fundamentals, API security (OAuth2), TDD/BDD. CI/CD with Jenkins and GitHub Actions; JUnit/TestNG; Docker containerization.

Postgraduate Degree in Information Technology — *Vistula University* Jun 2019 — May 2020

Advanced system architecture, software development, and data management; fully online international program.

Bachelor of Education — Turkish Language and Literature — *Balikesir University* Sep 1996 — Jun 2000

EARLIER CAREER

2000 – 2020: Educator and ultimately Principal at Sevgi Çiçeği Anafen Dershanesi (Türkiye, 2000 – 2014), then Counselor at Nigerian Tulip International Colleges (Nigeria, 2014 – 2020) — foundation for leadership, structured communication, mentoring, and cross-cultural stakeholder management.
